ОТЧЁТ
по лабораторной работе № 3
по курсу «Разработка кроссплатформенных приложений»
Вариант 4

Выполнили
студенты группы 22ВОЭ1
Брюзгин А. С.
Тихонов Д. А.

Приняли
Юрова О. В.

Пенза 2025

Цель работы

Изучить механизм обработки исключительных ситуаций.

Задание

Модифицировать приложение из предыдущей лабораторной работы, реализовав проверку вводимых данных с использованием механизма исключений. Необходимо создать свой класс, унаследованный от класса `Exception`, и генерировать исключение, если возникает попытка создать экземпляр класса `RecIntegral` со значениями, не являющимися числами в диапазоне от 0,000001 до 1000000. В качестве обработки исключения необходимо выводить диалог, содержащий предупреждение о некорректности введенных данных.

Выполнение программы

The screenshot shows a Java Swing window titled "Application". It contains three input fields at the top: "upper_limit" with value "0", "lower_limit" with value "0", and "Step" with value "0". Below these is a table with four columns: "Upper_limit", "Lower_limit", "Step", and "Result". The table is currently empty. At the bottom, there are five buttons: "ADD", "COUNT", "DELETE", "Add List", and "Delete List".

Рисунок 1 — Добавление кнопок Очистить/Заполнить

The screenshot shows the same application window, but the "upper_limit" field now contains "1", "lower_limit" contains "0.1", and "Step" contains "0.01". The table is now populated with four rows of data. The buttons "ADD", "COUNT", "DELETE", "Add List", and "Delete List" are still present at the bottom.

| Upper_limit | Lower_limit | Step | Result |
|-------------|-------------|------|--------|
| 0,5 | 0,1 | 0,01 | 0,126 |
| 0,6 | 0,1 | 0,01 | 0,187 |
| 0,9 | 0,1 | 0,01 | 0,47 |
| 1 | 0,1 | 0,01 | 0,611 |

Рисунок 2 — Заполнение

Рисунок 3 — Очистение

The screenshot shows a Java Swing window titled "RecIntegral". It contains three input fields at the top: "upper_limit" with the value "1", "lower_limit" with the value "0.1", and "Step" with the value "0.01". Below these fields is a table with four columns: "Upper_limit", "Lower_limit", "Step", and "Result". The table is currently empty. At the bottom of the window, there are five buttons: "ADD", "COUNT", "DELETE", "Add List", and "Delete List".

Ход работы

```
public class RecIntegral {

    private double ul = 0, ll = 0, stp = 0, rez = 0;

    private boolean ValidValue(double value) {
        return value >= 0.000001 && value <= 1000000;
    }

    public RecIntegral (double ul, double ll, double stp) throws ErrRecIntegralVal {
        if (!ValidValue(ul) || !ValidValue(ll) || !ValidValue(stp)) {
            throw new ErrRecIntegralVal("Значения должны быть в диапазоне от 0.000001 до
1000000");
        }
        this.ul = ul;
        this.ll = ll;
        this.stp = stp;
    }

    public RecIntegral( double ul, double ll, double stp, double rez) {
        this.ul = ul;
        this.ll = ll;
        this.stp = stp;
        this.rez = rez;
    }
}
```

Отлов ошибки

```
try{
    records.add(new RecIntegral(ul,ll,stp));
    tModel = (DefaultTableModel) jTable1.getModel();
    tModel.addRow(new Object[] {ul, ll, stp});
    i++;
}
catch (ErrRecIntegralVal e) {

    JOptionPane.showMessageDialog(null, e.getMessage(), "Ошибка ввода",
JOptionPane.WARNING_MESSAGE);
    throw new RuntimeException("Error" + e.getMessage(), e);
}
```

Пояснение к тексту программы(проверка ввода)

Строка 2: Объявление и инициализация полей класса.

Строка 3-5: Проверка введенных значений.

Строка 6-13: Создание конструктора класса, в котором проверяется правильность введенных данных, и если данные некорректны, то выводится ошибка, иначе данные заносятся в поля класса.

Строка 14-19: Перегрузка конструктора класса для записи значений и результатов расчета.

Пояснение к тексту программы(отлов ошибки)

Строки 1 - 6: Проверка кода, который может вызвать исключение.

Строки 6 – 9: Перехват исключения и вывод сообщения об ошибке в диалоговое окно.

Вывод

Изучен механизм обработки исключительных ситуаций. Написана программа.
