Брюзгин А. С.  
Тихонов Д. А.

Приняли  
Юрова О. В.

Пенза 2025

## Цель работы

Изучить библиотеку стандартных коллекций Java Collections Framework, позволяющую хранить различные структуры данных.

## Задание

Модифицировать приложение из предыдущей лабораторной работы, реализовав хранение данных таблицы с использованием библиотеки коллекций. Для этого реализовать класс RecIntegral, способный хранить одну запись таблицы. Для нечетных вариантов в качестве класса-коллекции выбрать ArrayList, для четных - LinkedList. Кроме того, добавить пару кнопок: очистить / заполнить, которые будут очищать таблицу и заполнять ее данными из коллекции соответственно.

## Исходный код программы

```
package my.contacteditor;

import static java.lang.Math.tan;
import java.util.LinkedList;
import javax.swing.JOptionPane;
import javax.swing.table.DefaultTableModel;

/**
 *
 * @author User
 */

public class ContactEditorUI extends javax.swing.JFrame {

    private LinkedList <RecIntegral> records = new LinkedList();
```

```

private DefaultTableModel tModel;

int i = 0;
/**
 * Creates new form ContactEditorUI
 */
public ContactEditorUI() {
    initComponents();
}

/**

## Выполнение программы

The application window displays three input fields at the top: **upper\_limit** (value: 0), **lower\_limit** (value: 0), and **Step** (value: 0). Below these is a table with four columns: **Upper\_limit**, **Lower\_limit**, **Step**, and **Result**. The table is currently empty. At the bottom, there are four buttons: **ADD**, **COUNT**, **DELETE**, and **Add List** (on the left), and **Delete List** (on the right).

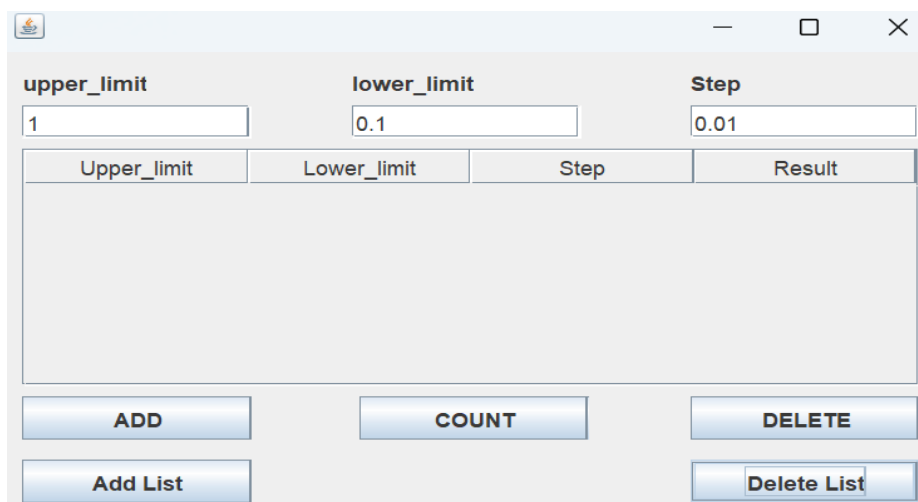

Рисунок 1 — Добавление кнопок Очистить/Заполнить

The application window displays the same three input fields: **upper\_limit** (value: 1), **lower\_limit** (value: 0.1), and **Step** (value: 0.01). The table below is now populated with four rows of data. At the bottom, the buttons **ADD**, **COUNT**, **DELETE**, **Add List**, and **Delete List** are visible.

Upper_limit	Lower_limit	Step	Result
0,5	0,1	0,01	0,126
0,6	0,1	0,01	0,187
0,9	0,1	0,01	0,47
1	0,1	0,01	0,611

Рисунок 2 — Заполнение

The application window displays the same three input fields: **upper\_limit** (value: 1), **lower\_limit** (value: 0.1), and **Step** (value: 0.01). The table below is now empty. At the bottom, the buttons **ADD**, **COUNT**, **DELETE**, **Add List**, and **Delete List** are visible.

Upper_limit	Lower_limit	Step	Result

## Ход работы

### Реализация класса RecIntegral

```
public class RecIntegral {  
  
    private double ul = 0, ll = 0, stp = 0, rez = 0;  
  
    public RecIntegral( double ul, double ll, double stp) {  
        this.ul = ul;  
        this.ll = ll;  
        this.stp = stp;  
    }  
  
    public RecIntegral( double ul, double ll, double stp, double rez) {  
        this.ul = ul;  
        this.ll = ll;  
        this.stp = stp;  
        this.rez = rez;  
    }  
  
    public double getValueUl() {  
        return ul;  
    }  
  
    public double getValueLl() {  
        return ll;  
    }  
  
    public double getValueStp() {  
        return stp;  
    }  
  
    public double getValueRez() {  
        return rez;  
    }  
}
```

## Пояснение к тексту программы(основные вычисления)

Строка 2: Объявление и инициализация полей класса.

Строка 3-7: Объявление конструктора класса для записи значений.

Строка 8-13: Перегрузка конструктора класса для записи значений и результатов расчета.

Строка 14 - 25: Объявление методов класса для записи значений в поля класса.

## Вывод

Изучена библиотека стандартных коллекций Java Collections Framework, позволяющая хранить различные структуры данных. Написана программа, использующая данную библиотеку.
